

# BERTL'S BEST 2007

## 12th Annual Awards

### *Most Productive Color Printer Range*

Lanier  
LP226cn / LP231cn

- **Heavy media is supported through all main supplies rather than just the bypass tray allowing for longer, uninterrupted runs of a wider range of documents**
- **Desktop queue manager provides a full list of print jobs, including page set quantities, allowing users to see the print workflow lined up for processing**
- **Large memory resources and powerful print processor enable the devices to power through print workflows and large files**
- **User-friendly, icon-driven RPCS driver offers high levels of print functionality with minimum user selections**
- **The RPCS driver lets users specify whether the processing workload should be carried out at the device or PC level**
- **Advanced print clustering capabilities via SmartDeviceMonitor include automatic or semi-automatic job rerouting and load balancing keeping network downtime and bottlenecks to a minimum**
- **The Job Binding feature in the RPCS driver and Desktop-Binder utility combine multiple documents from single or multiple applications into one file for batch printing**
- **Standard direct PDF printing and PostScript capabilities allow users to send large PDF files to the device without opening or RIPPING into PCL or PostScript 3 formats**
